

Session 2

1. Describe what you would need to do a dataview so that you can enter data in it in the Curator Tool. (If you have the AT available, try to do this.)

2. What is the :cropid as shown below?

What is its purpose/function? _____

3. How do you force a field to *not* display in the Curator Tool?

4. Practice – if you have the Admin Tool installed, practice:
 - a. copying a dataview
 - b. exporting a dataview
 - c. importing a dataview
