

AT Session 4's Homework

1. Run the sample SQL queries given on the presentation slides to see the results. (*except, don't* run the SQL queries for making data – slides 12 – 14).
2. Use the Import Wizard to review and then export to Excel the Code Groups and Codes.
3. In the Curator Tool, open the **Get Sys *Dataview* Field Lang** and the **Get Sys *Table* Field Lang** dataviews to review the friendly names used by your database.
4. (Optional) Use the Import Wizard to add five sites to the database.
