

AT Session 5's Homework

1. Review the Permissions in your database. Are there any security polices that were user created? How can you tell?
2. Review the Groups in your database. Which two are not being used?
3. Review the **CT Users** group. (Don' t change anything!)
4. Select a user and review his or her groups and permissions.
5.
 - (a) Create a permission that allows access to the **order_request** table.
 - (b) Create a Group that includes that permission.
 - (c) Add a user to that Group.
