

Session 6's Homework

1. On a PC that has the CT installed, go to the Users folder, visit the `C:\Users\<a-user-name>\AppData\Roaming\GRIN-Global\Curator Tool` and open each .txt file to review their contents.

2. Review & explore the folders:

Program Files\GRIN-Global\GRIN-Global Curator Tool
and
ProgramData\GRIN-Global\Curator Tool

3. Open & review the 3 .txt files in notepad or some text editor.
4. If you have access to SSMS, open the file **app_setting**, and look for the field **GrinGlobalClient_loginBanner**. Edit the field. Start up the CT to see the impact of your change.
5. In Program Files\GRIN-Global\GRIN-Global Curator Tool , delete the folder for your Icocl host and start the CT. Observe how this file gets rebuilt.
